## INJECTABLE REJUVENATION

### BOTOX, DYSPORT, AND JEUVEAU

FDA-approved treatments to temporarily treat horizontal forehead lines, crow's feet and vertical "11's" between the eyes. Can also treat excessive perspiration in areas such as the underarms, hands or feet.

### DERMAL FILLERS

Non-surgical option to create facial volume, correct wrinkles & balance the facial profile. Enhance cheeks, lips, chin, jaw, temples and undereyes.

### SCULPTRA

Stimulate the production of your own collagen and elastin to fill in dimples, correct hollowness, or create a fuller, smoother & more voluminous buttocks.

### KYBELLA

Permanently dissolves fat cells beneath the chin using FDA-approved enzymes administered through a series of superficial injections over several sessions.

### PDO THREAD LIFT

PDO Threading is a highly effective technique for patients who are interested in enhancing or reshaping facial contours or want to address crepiness or loose skin.

### PRP / PRFM

Platelet-rich Plasma (PRP) and Platelet-rich Fibrin Matrix (PRFM) are advanced injections designed to release your own natural growth factors that respond to tissue injury, to initiate and promote healing. Effective in treating hollowness and dark circles under the eye as well as improvement in tone and texture.

## SKIN & BODY REFINEMENT

### MORPHEUS8

Morpheus8 is a fractional skin treatment that stimulates collagen production of the underlying layers of the dermis. By targeting the deeper layers of the skin, tissues of the face and body can be remodeled to reveal a more radiant youthful appearance. Our most popular treatment to target skin tightening, fat reduction, scarring, cellulite and overall tone and texture.

### LUMECCA | INTENSE PULSE LIGHT (IPL)

Lumecca is the most powerful intense pulsed light (IPL) to treat sun spots, vascular lesions, rosacea, freckles and sun damage. After just one use, patients notice significant improvements in the complexion and clarity of the skin.

### MICRONEEDLING

Treat fine lines, pore size, acne scarring and overall tone and texture by stimulating collagen production and promoting cellular turnover. \*Add PRP/PRFM or a customized blend of brightening serum with filler/botox/dysport to maximize results.

### EXILIS

Made for skin tightening, this treatment delivers energy to the skin at an appropriate depth to help disperse/break down fatty tissue. This causes fat cells to shrink while simultaneously stimulating collagen production.

### EXCEL-V | LASER GENESIS

A non-invasive laser technology to safely, naturally and effectively treat fine lines, wrinkles, diffuse redness and scars. This can also be used to treat post surgical bruising.

## **INNER HEALING**

### **STELLAR LONGEVITY IV**

This anti-aging IV contains a combination of human connective tissue allograft as well as a proprietary blend of biological nanoparticles, antioxidants, and nutrients that are intended to increase vitality, reduce inflammation and fortify the immune response.

### **NAD+ IV**

NAD+ IV Therapy combats aging by activating enzymes, which have been proven to repair DNA, strengthen the immune system, protect brain cells, improve brain function and mood, combat chronic fatigue, improve athletic performance, lower cholesterol and blood pressure.

### **GLUTATHIONE IV**

A powerful antioxidant that protects and boosts the immune system against free radicals, heavy metals and pollutants. Important in energy production, weight management, skin health and lowering inflammation.

## **HAIR RESTORATION**

### **STELLAR SMARTGRAFT**

Using your own follicles and state-of-the-art FUE technology, this procedure has minimal downtime and can treat hair loss in the head, beard, or eyebrows.

### **PRP HAIR INJECTIONS**

Platelet-Rich Plasma (PRP) uses your own platelets to stimulate hair growth through a series of micro-injections for a stronger, more robust hair follicle. Growth factors found within PRP can help promote and regenerate dormant follicles.

## **WEIGHT MANAGEMENT**

### **SEMAGLUTIDE | TIRZEPATIDE**

Semaglutide and tirzepatide are GLP-1 receptor agonists that have demonstrated significant weight loss benefits when administered once weekly. Both medications work by reducing appetite and enhancing satiety, making them effective tools in comprehensive weight management programs.
